- i) Mary and John usually _____ (play) together.
- j) The girls and the boy _____ (walk) in the evening.
- k) The furniture of the house (is - are) quite impressive.
- l) Few students (is - are) coming to the party.
- m) Uma, my childhood friend (is - are) leaving for Delhi next month.
- n) Most of my friends (work – works) in the government.
- o) Either Tina or Rohit (is/are) telling lies.
- p) A few people (was/were) sick because of the rain.

3. Connectives

(so – because – after – and – however – although – but – when -before)

- a) The weather was sunny, _____ we decided to go to the beach.
- b) _____ the movie was very long, we still enjoyed it.
- c) I wanted to go outside. _____, it was raining.
- d) I didn't go to school _____ I was sick.
- e) _____ I finished my homework, I went to bed.
- f) We went to the park yesterday _____ we ate ice cream.
- g) My mum doesn't like dogs, _____ I do.
- h) The game ended _____ the referee blew his whistle.
- i) She couldn't ride her bike _____ it had a puncture.
- j) We arrived on time, _____ the train was late.
- k) I fell over _____ and hurt my knee.
- l) _____ he went to bed, he remembered to wash his teeth.
- m) The test was very difficult. _____, we got the full mark.

4. Replace the verb with a powerful verb and replace the adjective with a powerful adjective:

a) The car moved slowly.

b) The boy talked to his mother in a low voice.

c) The little kids ran across the field.

d) The dog was standing still.

e) Her voice was very weak because she was sick.

f) The clever merchant didn't sell the house.

g) The band's performance was amazing.

h) The floor was very clean when we came in.

i) The monster in this story was ugly.

5. Rewrite the sentence as an order.

a) Please clean your room.

b) Can you take out the trash?

c) Please pass the salt.

d) You should talk to your friends nicely.

e) Please close the door behind you.

6. Underline the adverbial in the sentences below:

a) In the morning, I woke up early.

b) After the rain stopped, we went outside to play.

c) He placed his pencil on the table.

d) Last week, our new neighbors moved in.

e) The strange insect crawled across the wall.

f) Show Simon your project in the morning.

g) Mike will sit in the corner.

h) In the hallway, the prince met his old friend.

i) The explorer travelled across the world.

7. Fill in the blank with a fronted adverbial

- a) _____, the wolf ate the boy.
- b) _____, he finished his homework.
- c) _____, his mum came home.
- d) _____, Cinderella forgot her glass shoe.
- e) _____, you need to study for your quiz.
- f) _____, she stood and waited.
- g) _____, the black cat began to wake.
- h) _____, my sister talked on her phone.

8. Underline the subject and circle the object in the following sentences:

- a) The cat chased the mouse.
- b) She baked a delicious cake for her friend's birthday.
- c) Her friend gave her a gift.
- d) The princess threw away the crown.
- e) The boy hit the wolf with a stick.
- f) The clever baby beat the chief.
- g) He yelled at his friends.
- h) The lady opened the door.
- i) James climbed the hill.
- j) The teacher spoke to the class.
- k) Lucy washed the dishes.
- l) The man watched the boats.

Comprehension

The Solar System

The solar system is a fascinating place with a variety of celestial bodies. It consists of the Sun, eight planets, moons, asteroids, comets, and other objects. Let's delve into the wonders of our solar system!

The Solar System

Our solar system is made up of several components. At the center is the Sun, a massive ball of hot gases that provides light and heat to the planets. The eight planets, Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune, revolve around the Sun in elliptical orbits. Each planet has unique features and characteristics.

Moons are natural satellites that orbit planets. Earth has one moon, while other planets have multiple moons. Moons come in different sizes and shapes and can provide valuable information about the planets they orbit.

Asteroids are rocky objects that orbit the Sun, mainly found in the asteroid belt between Mars and Jupiter. They vary in size, from small rocks to dwarf planets like Ceres. Comets are icy bodies that originate from the outer regions of the solar system. When they approach the Sun, they develop a glowing coma and a tail.

Scientists have sent numerous missions to explore the solar system. Robotic spacecraft like Voyager, Cassini, and Curiosity have provided valuable data and images of planets, moons, and other celestial objects. These missions have helped scientists learn more about our solar system's formation, geology, and potential for supporting life.

Answer the following questions based on the above comprehension:

1. What are the main components of our solar system?

2. Name the eight planets in our solar system.

3. How does the Sun contribute to the solar system?

4. What are moons and how do they provide valuable information?

5. Where are asteroids primarily found in the solar system?

6. Explain what happens to comets when they approach the Sun.

7. How have robotic spacecraft contributed to our understanding of the solar system?

8. Which planet in our solar system has the most moons?

9. Imagine you are a scientist studying the solar system. What would be the most exciting aspect to explore further? Why?

10. Based on what you've learned about the solar system, do you think there is life on other planets? Why or why not?

The Importance of Recycling

Recycling is a crucial practice that helps protect the environment and conserve valuable resources. It involves collecting and processing waste materials to create new products. Let's explore the significance of recycling and its positive impact on our planet.

The Importance of Recycling

Recycling plays a vital role in reducing waste and conserving natural resources. When we recycle materials like paper, plastic, glass, and metal, we save energy and reduce the need for raw materials. This, in turn, helps preserve forests, conserve water, and protect ecosystems.

One of the essential benefits of recycling is the reduction in greenhouse gas emissions. By recycling materials, we can reduce the amount of waste sent to landfills, where it would release harmful gases like methane. Additionally, recycling reduces the energy required to produce new products, leading to lower carbon emissions.

Another advantage of recycling is the conservation of resources. Materials like paper, which are made from trees, can be recycled to produce new paper products. By recycling paper, we preserve forests and prevent deforestation, which is vital for maintaining biodiversity and combating climate change.

Recycling also helps create employment opportunities in recycling facilities and industries that process recycled materials. It stimulates economic growth and contributes to a sustainable and circular economy.

Answer the following questions based on the above comprehension:

1. What is recycling, and why is it important?

2. Name some materials that can be recycled.

3. How does recycling help conserve natural resources?

4. Explain the connection between recycling and the reduction of greenhouse gas emissions.

5. How does recycling contribute to the conservation of forests?

6. Describe the economic benefits of recycling.

7. Do you think recycling should be mandatory? Why or why not?

8. What are some challenges or barriers to recycling? How can they be overcome?

9. Imagine a world without recycling. How do you think it would impact the environment and society?

10. As an individual, what actions can you take to promote recycling in your community?
