
How can we help planet Earth?

Unit 4 L7

*Non-renewable
energy -
problems*

- Fossil fuels

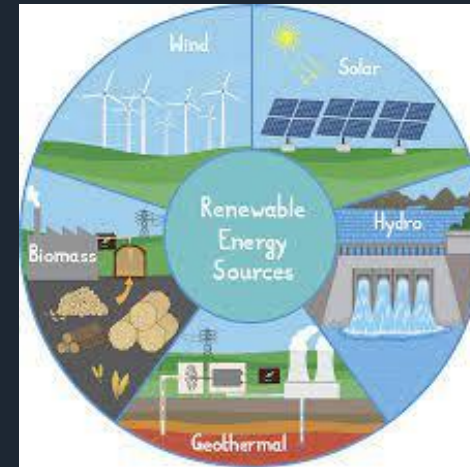

- Coal

- Nuclear

Renewable energy

- *solar panels*
- *Wind turbines*
-
- Geothermal heating*
(*volcano energy*)
- *ocean tidal*
- *Hydro*

LET's Create

Unit 4 L 8

Task

- Half the class are going to create a poster of problems on Earth if we don't stop global warming – flooding , factories , hot temperatures, desertification, plastic
- The other half will do solutions and the result. - renewable energy sources , clean areas , people walking less car, green spaces

*Global warming if we don't stop it
and if we do examples*
